

Tuesday May 19th 1891

Father went to town with Mr West this morning. Mr J. S. Davis went east today but will probably be back sometime sooner or later. I took the Hanging Gardens to Mrs West this forenoon. I worked on the Lost Cabin ledge today & the mineral seems to get better as I go in. We had about $4\frac{1}{2}$ hours of rain till after noon. Mr West was surprised when he saw the hanging gardens this evening.

Wednesday May 20th 1891

I took about $1\frac{1}{2}$ tons of mineral from the Lost Cabin ledge today making 6 or 7 tons in all of the lower dump. I expected A. M. Willard over today but he did not come as he was busy at something.

Thursday May 21st 1891

I got up early this morning but did not get breakfast until later. I went over to Martin's Valley with Mr West this forenoon to look at the country. I saw Montgomery breaking granite while there (in the Valley). I took a specimen from the Chamber of Frost over to Mrs West this afternoon. Mary went over with me, & drilled the first hole ever drilled in the Lost Cabin ledge today (single handel). Elmer is over to Grinnell today & will not be back until tomorrow night.
